**Subject:** NBSA SEDFlume summit

Rob et. al,

Jason Magalen from SEA Engineering will be in town in May. We would like to have a meeting with the CPG sediment transport modelers to discuss the Newark Bay SEDFlume data. By then we hope, that all of us would have had a chance to look at the data and do some interpretation. We think this discussion will be long enough to be a meeting in itself, but we're open to suggestions on whether we can combine it with a modeling meeting. Right now, Jason is pretty open until the end of May. Will Han be available to come to NYC in May?

Let me know,

eugenia
